

Specialty Packaging Series Streamfeeder ST-1250 Vertical Discharge

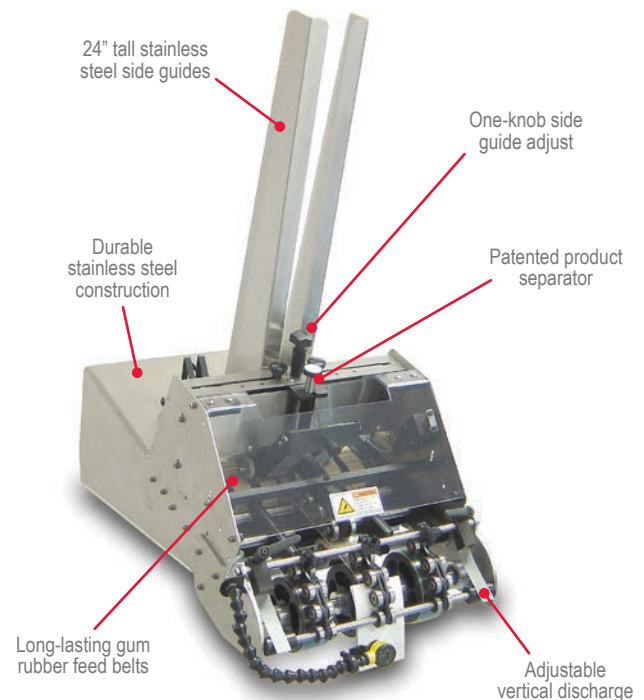

Overview

The ST-1250 Vertical Discharge is specially designed to feed and dispense products vertically downward into targets such as boxes, open books, containers, and more. The feature-rich *iQuipped Intelligent System Controller* provides high performance operation with user-friendly menus. The ST-1250 Vertical Discharge is ideal for use in vertical applications and easily integrates mechanically and electrically for increased system efficiency.

Feed a wide variety of flat card type products into boxes, open books, containers, and more. Operates on-demand one at a time and has batch counting capabilities.

Standard Features

Vacuum fluorescent display with easy to use menus • Long-lasting natural rubber feed belts • One-knob side guide positioning • Patented advancing O-ring separator for product separation • Tool-less vertical discharge adjustment • Miss-detect • Timeout stop • Photo-sensor trigger input • Isolated inputs / outputs for system integration • Trigger delay • Self-triggering feature for stand-alone operation • Stainless steel construction
